PROFESSIONAL SUMMARY

Senior backend engineer with 5+ years building event-driven, high-throughput fintech and logistics systems (Kafka, Spring Boot, NestJS, Go). At Moniepoint, one of Africa's largest fintechs, architected savings infrastructure that generated billions of naira in deposits within six months and scaled to 10M+ monthly requests with a 99% notification success rate and zero fraud cases. Specialises in fault-tolerant distributed systems, idempotent high-volume job processing, and reliable async collaboration across distributed, multi-timezone teams.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Go, Python

Frameworks & APIs: NestJS, Spring Boot, Express.js, Next.js, REST, gRPC

Messaging & Streaming: Apache Kafka, RabbitMQ, WebSockets

Databases: PostgreSQL, MongoDB, MySQL, DynamoDB, Redis

Cloud & DevOps: AWS, GCP, Firebase, Docker, Kubernetes, GitHub Actions, CircleCI, Jenkins

Testing: Jest, Mocha, Cypress

WORK EXPERIENCE

Backend Engineer

Jun 2024 – Present

Moniepoint Inc. · Lagos, Nigeria · Primary engineer on the Target Savings product

- Recognized as part of the **Best Team at Moniepoint for the first half of 2026 (H1)**, awarded for sustained delivery and reliability across the savings platform.
- Led backend development of the Target Savings product using Java (Spring Boot) and Kafka, scaling to ~5,000 new savings plans daily with sub-250ms API response times.
- Architected an event-driven savings processing system scaling to ~10M monthly requests with a 99% notification success rate and zero fraud cases, generating billions of naira in deposits within six months of launch.
- Designed a high-throughput, idempotent job-processing system handling ~1,000,000 active jobs per day, eliminating race conditions and bottlenecks.
- Reduced customer-reported issues by 90% within one month post-launch through proactive monitoring, performance tuning, and rapid incident resolution.
- Refactored the core savings codebase to harden reliability; the service ran roughly two months post-refactor with zero P1/P2 (priority-one/two) production incidents.
- Earlier (Cash Management): built backend services for high-volume cash-movement workflows using NestJS and PostgreSQL and integrated ML-based image/text validation pipelines, cutting validation latency 30–40% at scale and customer cash-sourcing issues by ~40%.

Senior Backend Engineer (Contract)

Mar 2025 – Apr 2026

GetStac · Lagos, Nigeria · Fixed-scope contract engagement

- Designed and built the core agent-to-store matching platform in Go with sub-300ms latency and a fault-tolerant architecture, processing ₦100M in daily transaction volume.
- Drove a 60% reduction in customer-facing errors through robust data-consistency and lifecycle management, eliminating all manual data fixes.
- Reduced customer-reported issues by 70% in under one month via improved logging, alerting, and structured deployment practices.

Full Stack Engineer

Apr 2022 – Dec 2024

IX Note Service Limited · Abuja, Nigeria

- Delivered critical security enhancements on the PXN wallet app, increasing user satisfaction 60% and reducing vulnerabilities 80%.
- Built an analytics event-collection framework in TypeScript processing data from 10,000+ concurrent users.

Backend Developer

Jan 2022 – Dec 2024

Cargle · Abuja, Nigeria

- Engineered a logistics dispatch system with a >90% completion rate, contributing to a 15% annual revenue increase for Spikk Deliveries.
- Achieved 35%+ monthly cloud-cost reduction via multi-cloud optimisation across AWS, GCP, and DigitalOcean; cut security vulnerabilities 90% through targeted hardening.

Full Stack Developer

Aug 2021 – Mar 2022

Industrial Training Fund (ITF) · Abuja, Nigeria

- Built the ITF Board Meeting Software, delivering \$600/month in cost savings and mentoring junior developers in core programming practices.

Software Developer Intern

Jun 2020 – Jul 2021

IX Note Service Limited · Abuja, Nigeria

- Developed backend infrastructure for the Krakenhaus hospital-management application, contributing to a 75% uplift in customer satisfaction.

EDUCATION

B.Eng, Computer Engineering

2021

Covenant University, Ota, Nigeria
